BJC Specialties Company Limited

PARTNERING WITH CJ BIO IN VIETNAM

TasteNrich® HYBIND & Food-Grade Amino Acids (FGAA)

Introduction meeting with CJ BIO Vietnam | MS Teams | 15 October 2026

Present by: Nguyen Ducc Duy Anh

BJCSpecialties

White Group Public Co., Ltd.
Quality and Sustainables Growth with Partners.

Executive Summary

BJCS Vietnam is ready to grow TasteNrich® HYBIND & FGAA in Vietnam — building on BJC's existing CJ BIO partnership in Thailand

Proven CJ BIO partnership

BJC already distributes HYBIND & FGAA for CJ BIO in Thailand — one regional partner, aligned positioning and shared know-how.

The right customers, today

~90 customer accounts incl. Masan, CJ Cầu Tre, Ajinomoto, Unilever, Navico, Seapimex, Hoa Linh and Merap.

Technical & regulatory selling

Food, Cosmetic and NPD teams, BJCS Application Lab (Bangkok) and in-house handling of import & declaration dossiers.

Supply chain ready

Ex-stock (local warehouse, VND invoicing, door-to-door) and Indent (CIF HCMC / Hai Phong); offices in HCMC & Hanoi.

OUR PROPOSAL

Appoint BJCS Vietnam as distributor of HYBIND & FGAA → 90-day onboarding → customer trials from Q1 2027 with ~20 priority accounts across North, Central & South Vietnam

Source: BJC Vietnam experience (Customer 360, 2026 YTD); CJ BIO Vietnam e-mail, 7 Oct 2026 (BJC Thailand = CJ distributor for Hybind & FGAA).

Agenda

1. Who we are

BJC Specialties, our CJ BIO link and the BJCS Vietnam platform

Slides 4 – 8

2. Market & regulatory landscape

Food industry, market size for HYBIND & FGAA, rules that apply today

Slides 9 – 13

3. Opportunity map

Applications, target accounts by segment and by North / Central / South

Slides 14 – 20

4. How we win

Value proposition, customer pain points, account approach, competition

Slides 21 – 26

5. Roadmap & partnership

Go-to-market milestones, proposal and next steps

Slides 27 – 28

World-leading manufacturers we represent

BJC × CJ BIO: Thailand to Vietnam

THAILAND — TODAY

CJ BIO Bangkok ⟷ **BJC Thailand**

BJC is CJ BIO's distributor for TasteNrich® HYBIND & FGAA

VIETNAM — PROPOSED

CJ BIO Vietnam ⟷ **BJCS Vietnam**

Same portfolio · same partner · dedicated local team

What CJ BIO gains

One regional partner

Consistent positioning, pricing discipline and key-account approach across Thailand and Vietnam.

Faster ramp-up

Product know-how, application learnings and references shared from BJC Thailand with the Vietnam team.

Shared technical resources

BJCS Application Lab in Bangkok for meat trials, demos and customer training.

Regional sponsorship

BJC regional management oversight, with a dedicated local team executing in Vietnam.

BJCS Vietnam – Platform Today

Presence

- In Vietnam since 2007
- Offices in Ho Chi Minh City & Hanoi
- ~90 customer accounts North – Central – South (2026 YTD)

Route to market

- Ex-stock: local warehouse, VND invoicing, door-to-door delivery
- Indent: direct shipments CIF HCMC / Hai Phong
- Import & declaration dossiers handled in-house

Team & leadership

- 5 account owners (Food, Cosmetic, Non-food) + NPD manager
- Led by Nguyen Duy Anh – 21+ years in Vietnam's food & chemical ingredients industry
- Customer 360 account plans & opportunity pipeline

Principals & categories we manage in Vietnam today

Preservatives
LANXESS · Wuhan Youji (Sodium Benzoate)

Yeast extracts
Lallemand (previously Lesaffre & DSM)

Flavors

Vietnam Food Industry at a Glance

US$88 bn
food processing industry 2025 (+11%)

US$9.5 bn
beverage manufacturing 2025

101.9 M
consumers; GDP US$514 bn

+8.0%
GDP growth 2025

Key trends that matter for HYBIND & FGAA

Food safety first

Recent scandals in canned meat and nutritional beverages push manufacturers toward safe, high-quality, documented ingredients.

Convenience & branded meat

Ready-to-cook and convenience foods grow with the middle class; MEATDeli, C.P. and Ba Huân run their own retail.

Domestic brands rising

Processors shift from export dependence to the home market and build their own brands — more formulation work.

Health & functional

Rising demand for functional and health-oriented beverages, low-sugar and nutrition products.

Sources: USDA FAS GAIN 'Food Processing Ingredients Annual – Vietnam' VM2026-0004 (Apr 2026); World Food 'Vietnam Country Profile' 2025.

BJCSpecialties

White Group Public Co., Ltd.
Quality and Sustainables Growth with Partners.

HYBIND – Market Size & Drivers

~39 kg

pork per capita 2025 (≈30 kg in 2021); pork >63% of livestock-product consumption

5.4 Mt

pork produced 2025 — Vietnam is #4 globally in pork consumption

7.4 Mt

frozen aquatic products 2025 (3.0 Mt in 2021)

US$11.3 bn

seafood exports 2025 (+12.4%): shrimp US$4.6 bn, pangasius US$2.2 bn

Where HYBIND plays

- **Processed meat:** sausage, ham, giò lụa / chả, meatballs, canned meat
- **Poultry:** marinated / injected, coated & fried chicken
- **Frozen convenience food:** dumplings, spring rolls, ready meals
- **Seafood*:** shrimp, pangasius, squid — phosphate-based water-retention agents widely used

Growth drivers

- Industrial, branded meat is scaling up — e.g., MEATDeli Long An planned 15,000 t/yr processed products (phase 1)
- Meat & meat-product imports US$1.78 bn in 2024 (+18%) — room for local processing
- Clean-label pressure from modern retail and export buyers (Japan, EU, Korea, US)
- Yield = margin under raw-material cost pressure

Sizing next step: phosphate-replacement volume to be sized jointly with CJ BIO from phosphate import data and plant audits at priority accounts

*Sources: MOIT Domestic Market Dept. (via VNA, Feb 2026); GSO via USDA GAIN VM2026-0004; VASEP 2025; World Food Vietnam Profile 2025; VnBusiness (Oct 2020). *Seafood subject to CJ validation.*

FGAA – Market Size & Drivers

US$888 M

dietary supplements 2024 → US$1.95 bn by 2033 (CAGR 8.2%)

US$1.3 bn

energy drinks 2025 → US$1.88 bn by 2030 (CAGR 7.8%)

>12%

CAGR of the functional / fitness-oriented drink segment

~10%

share of Wake-up 247 (Masan Consumer – BJCS customer) in energy drinks, 2024

Where FGAA plays

- **Health supplements (TPBVSK):** vitality, liver support, men's health, recovery
- **Energy & functional drinks:** energy, endurance, bird's-nest drinks
- **Sports, adult & medical nutrition:** powders, RTD, clinical formulas
- **Personal & oral care:** pH adjuster, conditioning, sensitive-teeth care

Growth drivers

- Health consciousness and active lifestyles among young urban consumers
- GMP-certified supplement manufacturing and a large OEM / ODM base
- Premiumization: vegan, fermentation-derived, clean-label actives
- Brand owners tightening supplier audits after food-safety incidents

Sizing next step: amino-acid volumes are not published — to be built bottom-up from customer formulations and import data with CJ BIO

Sources: IMARC Vietnam Dietary Supplements Market (2025); Mordor Intelligence, The Report Cube & Frost & Sullivan (via Masan Consumer AR 2024), compiled by B-Company (2025).

Regulatory Status Today

02/2018	26/01/2026	04/02/2026	06/04/2026	Oct 2026 →
Decree 15/2018/ND-CP	**Decree 46/2026/ND-CP**	**Resolution 09/2026/NQ-CP**	**Resolution 15/2026/NQ-CP**	**Amended Food Safety Law**
Current basis for food safety rules	+ Resolution 66.13/2026: stricter declaration & import inspection	Decree 46 suspended	Suspension extended until amended Food Safety Law takes effect	1st reading Oct 2026; adoption targeted May 2027

What applies today

- Decree 15/2018: self-declaration for packaged food, additives & processing aids; registration for health supplements, medical / special-diet foods and new-use mixed additives
- Circular 24/2019/TT-BYT (amended by Circular 17/2023/TT-BYT): permitted additives, uses & maximum levels
- Circular 18/2019/TT-BYT: GMP mandatory for health-supplement manufacturing

What is coming

- Decree 46 direction: registration instead of self-declaration; tighter sampling & testing of imported food
- Draft amended Law: clearer validity periods, re-registration only for core changes, digital data system
- Transition rules still open — watch the 2027 effective date

BJCS approach: file under the regime in force, but build every dossier to the stricter standard from day one

Sources: Decree 15/2018/ND-CP; Decree 46/2026/ND-CP; Resolutions 09/2026 & 15/2026/NQ-CP; MOH Submission 238/TTr-BYT; NA Standing Committee (Báo Quốc tế, 25 Sep 2026).

Regulatory Pathway & Checklist

Topic	Requirement today (Decree 15/2018 regime)	Owner	Watch-out
HYBIND classification First decision	Confirm VN status: food ingredient vs. food additive (INS) under Circular 24/2019 & 17/2023	CJ BIO + BJCS	If a mixed additive with new use → MOH registration; drives ingredient name on customer labels
Ingredient import HYBIND & FGAA	Self-declaration by importer; test report ≤12 months (designated / ISO 17025 lab); Vietnamese sub-label (Decree 43/2017, 111/2021)	BJCS	Manufacturers importing for own production are exempt from self-declaration
Import inspection Each shipment	Reduced / ordinary / strict methods (Decree 15/2018); reduced inspection for GMP, HACCP, ISO 22000, FSSC 22000 plants	BJCS (CJ certificates)	Plant certificates from CJ BIO shorten clearance
FGAA in health supplements TPBVSK	Product registration with VFA (MOH); GMP-certified manufacturing; advertising content pre-approval	Brand owner (BJCS supports)	Evidence for claims & dosage; ingredient specs must match dossier
FGAA in drinks & foods Conventional food	Finished-product self-declaration; labeling & claims compliance	Brand owner	Functional claims must not imply disease treatment
Personal & oral care Arginine	Cosmetic product notification by brand owner (Circular 06/2011/TT-BYT; ASEAN Cosmetic Directive)	Brand owner	Cosmetic-grade documents (INCI, safety data) needed
Halal / Kosher / Vegan Voluntary	Required by export & multinational customers	CJ BIO	Confirm certificate scope per SKU and plant

Sources: Decree 15/2018/ND-CP; Circulars 24/2019, 17/2023, 18/2019, 06/2011/TT-BYT; Decrees 43/2017 & 111/2021/ND-CP; BJC Vietnam experience. Planning summary, not legal advice.

HYBIND – Priority Meat Accounts

Account	Status	Pain point / need*	HYBIND value	Key success factor
Masan MEATLife MEATDeli · 3F Việt chicken	**BJCS customer** Masan Group · N & S	Premium 'safe meat' brand needs cleaner labels without losing yield and bite	Phosphate replacement with comparable cooking yield & texture	R&D trials on giò lụa & sausage; cost-in-use vs. current phosphate blend
CJ Cầu Tre Dumplings, spring rolls, meatballs	**BJCS customer** South	Juicy fillings and stable texture through freezing and steaming	Better water retention, less purge in frozen fillings	CJ group synergy – first Vietnam reference case
LC Foods Sterilized sausage, ready meals	**BJCS customer** South	Yield and texture loss under retort sterilization	Higher cooking yield, less purge over shelf life	Validate performance under retort conditions
Nitto Fuji Batter, breading, premixes	**BJCS customer** South	Processors asking for phosphate-free marinade & coating systems	HYBIND-based marinade / premix co-development	Joint development; Nitto Fuji as channel to processors
Vissan Ham, sausage, canned meat	**Potential** South	Mass-market cost pressure; consistent yield at large scale	Yield parity with cleaner label → premium SKUs	Start with one premium SKU; joint trial with CJ
C.P. Vietnam Sausage, meatballs, chicken	**Potential** South	Integrated cost optimization; export chicken specifications	Yield gain in marinated / injected chicken	Cost-in-use model; multi-plant roll-out
Koyu & Unitek Processed chicken for Japan	**Potential** South	Strict Japanese buyer specs on additives & labeling	Clean-label yield solution for export programs	Complete documentation for Japanese buyer approval
Daesang Đức Việt German-style sausages	**Potential** North	Premium bite & juiciness; clean-label trend	Juiciness & texture with a 'no added phosphate' option	Align with CJ first (Daesang is a CJ competitor in Korea)

**Source: BJC Vietnam experience & company public information – hypotheses to be validated in customer meetings.*

HYBIND – Seafood Opportunity

US$11.3 bn seafood exports in 2025. Phosphate-based water-retention agents are common in shrimp, squid and pangasius processing, while export buyers increasingly ask for non-phosphate (NP) / 'untreated' products.

HYBIND – Value Proposition

USP checklist

Confirmed by CJ BIO public data

- ✓ Natural phosphate alternative, clean label
- ✓ E-number free & allergen-free
- ✓ High cooking yield, less purge loss
- ✓ Moisture retention, texture & taste
- ✓ Whole muscle, emulsion, coarse, cold cut, frozen
- ✓ Supplied from Indonesia (ASEAN)

To confirm with CJ BIO

- ? Composition → VN classification & label name
- ? Halal / Kosher / Non-GMO certificates
- ? Dosage & cost-in-use benchmarks
- ? Poultry & seafood performance data
- ? Shelf life & storage conditions

Gain creators

- Clean-label & premium SKUs at higher price points
- Export readiness for demanding buyers
- Brand differentiation in modern retail

Pain relievers

- Keeps yield & bite when phosphate is removed
- Controls purge in vacuum packs & freeze–thaw
- Avoids soapy / metallic notes of phosphate overdose

Products & services

- TasteNrich® HYBIND
- BJCS application support & trial protocol
- Regulatory dossier & label-naming guidance

TCO logic: net cost per kg finished product = ingredient cost difference − value of extra cooking yield − premium / export uplift

Sell cost-in-use, not price per kg

Sources: cjbio.net – TasteNrich® HYBIND product page (Oct 2026); Ingredients Network; canvas & TCO: BJC Vietnam experience.

BJCSpecialties

White Group Public Co., Ltd.
Quality and Sustainables Growth with Partners.

HYBIND – Customer Pain Points

Cost & economics

CUSTOMER PAIN

- Higher cost per kg than phosphate
- Margin pressure
- ROI uncertainty

OUR RESPONSE

- Cost-in-use model per kg finished product
- Yield gain offsets price gap
- Target premium & export SKUs first

Technical performance

CUSTOMER PAIN

- Water-holding gap vs. phosphate
- Purge in vacuum packs, freeze–thaw
- Texture: bite & elasticity
- Process changes (chopping, pH)

OUR RESPONSE

- Lab trial → pilot plant trial
- Dosage optimization with CJ data
- Meat equipment at BJCS lab

Sensory

CUSTOMER PAIN

- Fermented off-note or aftertaste
- Colour change (pink tone)
- Masking of meat flavour

OUR RESPONSE

- Blind sensory test vs. current formula
- Flavor fine-tuning with BJCS flavor partner (dsm-firmenich)

Operations & regulatory

CUSTOMER PAIN

- R&D workload for reformulation
- Ingredient naming on labels
- Import supply continuity

OUR RESPONSE

- Turn-key trial protocol with customer R&D
- Regulatory & label guidance
- Ex-stock inventory in Vietnam

Source: BJC Vietnam experience with meat & seafood processors.

BJCSpecialties

White Group Public Co., Ltd.
Quality and Sustainables Growth with Partners.

FGAA – Value Proposition

USP checklist

Confirmed by CJ BIO public data

- ✓ Fermented from non-GMO plant material
- ✓ Vegan · Non-GMO · non-animal origin
- ✓ Arginine: protein building & NO release
- ✓ Histidine: muscle & brain metabolism, carnosine
- ✓ Sports, metabolic, beauty & food uses

To confirm with CJ BIO

- ? Halal / Kosher certificates per SKU
- ? Purity & heavy-metal specifications
- ? Production plant & certificate of origin (FTA)
- ? API (pharma) & cosmetic-grade documents
- ? Recommended dosages & claim support

Gain creators

- Clean-label, vegan claims for premium & export lines
- Easier audits by MNC & modern-retail buyers
- Synergistic Arg + Cit concepts for energy / pre-workout

Pain relievers

- Removes doubts on purity, residues & origin
- Full COA / TDS dossier for product registration
- Global supply reliability

Products & services

- L-Arginine · L-Citrulline · L-Histidine
- Formulation & taste-masking support (BJCS flavors)
- Regulatory support for customers' dossiers

Risk-adjusted value: documented, premium actives protect brand owners from audit failures, rejections and recalls
Sell a formulation solution, not a commodity

Sources: cjbio.net – AMINATURE® product page (Oct 2026); SupplySide Global 2026 listings; canvas: BJC Vietnam experience.

BJCSpecialties

White Group Public Co., Ltd.
Quality and Sustainables Growth with Partners.

FGAA – Customer Pain Points

Taste & sensory

CUSTOMER PAIN

- Bitter / metallic notes (Arg, His)
- Interference with fruit or dairy flavors

OUR RESPONSE

- Taste-masking: pH buffers, natural sweeteners, masking flavors
- BJCS flavor partner (dsm-firmenich)

Stability & formulation

CUSTOMER PAIN

- Solubility at high dose in RTD
- Maillard browning in heat treatment
- Hygroscopicity & caking in dry blends

OUR RESPONSE

- Dissolution protocol (temperature, order of addition)
- Stability trials with customer R&D
- Storage & handling guidance

Regulatory & quality

CUSTOMER PAIN

- Supplement registration hurdles
- Purity, residues, traceability
- Brand-owner audits (Halal, Kosher, Vegan)

OUR RESPONSE

- Full COA / TDS / spec dossier from CJ
- Certificates per SKU
- BJCS support for customer dossiers

Cost & commercial

CUSTOMER PAIN

- Higher price than low-grade sources
- Effective dose vs. retail price

OUR RESPONSE

- Value positioning: fermented, vegan, clean label
- Dose-efficient Arg + Cit combinations
- Focus on premium SKUs

Source: BJC Vietnam experience with supplement, beverage & personal-care manufacturers.

Account Approach & Trials

Decision map at each account

Economic buyer · Plant director / owner

Cost per kg finished product, yield, payback

User buyer · R&D / product development

Water holding, texture, freeze–thaw, taste, solubility

Technical buyer · QA / QC & regulatory

Legal status, microbiology, Halal / Kosher / Non-GMO documents

HYBIND trial protocol

1	2	3
Lab-scale trial Solubility, pH, water-holding with customer R&D	**Pilot / plant trial** Dosage optimization; texture & yield on the real line	**Blind sensory test** Prove consumers cannot tell the difference

FGAA co-development

1	2	3
Concept & ingredient matching Format, claim, target dose	**Taste & stability optimization** Masking, buffers, dissolution, shelf life	**Commercial scale-up** Technical support from lab to full production

SPIN discovery – example need-payoff question

"If a natural solution matched your current phosphate yield and removed additive codes from your label, how would that change your premium and export lines?"

Source: BJC Vietnam sales methodology (strategic account management, SPIN, structured trials).

Competition & CJ Positioning

Phosphate replacement – HYBIND

Conventional phosphates (STPP & blends)

+ Proven yield, lowest cost per kg
– Labeled additives (INS 450–452); clean-label & buyer pressure

Other phosphate-free systems

+ Clean label (fibers, starches, proteins, carbonate blends)
– Often partial functionality; may affect texture / taste or need reformulation

Amino acids – FGAA

Japanese premium producers

+ High quality & brand trust
– Premium price

Chinese commodity producers

+ Price-competitive
– Variable consistency; supply-continuity risk

TasteNrich® HYBIND – CJ BIO

+ Natural, E-number-free & allergen-free; high cooking yield, low purge, better texture & taste; ASEAN supply

→ **Win on cost-in-use & label benefit**

AMINATURE® – CJ BIO

+ Fermented from non-GMO plant material; vegan; global scale & consistent quality

→ **Win on quality, reliability & clean-label story**

Our selling approach: sell value (cost-in-use, label, claims) and prove it with application trials — not price per kg

Go-to-Market Roadmap

1 ONBOARD
Oct – Dec 2026

- Distribution agreement & NDA
- CJ product training for BJCS team
- Confirm HYBIND classification & certificates
- Declaration dossiers, sub-labels
- Price, MOQ, lead time

2 SEED
Q1 2027

- Present & sample ~20 priority accounts
- Joint visits CJ BIO VN + BJCS
- Lab trials (customer labs / BJCS Application Lab)

3 VALIDATE
Q2 2027

- Plant trials & blind sensory tests
- Cost-in-use & shelf-life validation
- Customer approvals & first orders

4 SCALE
H2 2027

- Ex-stock inventory for fast delivery
- Expand to second-tier & Central-region accounts
- Quarterly business review with CJ BIO

What we report to CJ BIO every month

- **Accounts presented**
- **Samples delivered**
- **Lab & plant trials**
- **Customer approvals**
- **Pipeline value**

Source: BJC Vietnam plan. Volume targets to be set jointly with CJ BIO once trial results are available.

Partnership & Next Steps

Our proposal

- Appoint BJCS Vietnam as exclusive distributor of TasteNrich® HYBIND & FGAA in Vietnam
- Joint business plan with quarterly reviews; targets set after trials
- Open to explore the wider CJ BIO portfolio (e.g., nucleotides I+G, TasteNrich® range) at a later stage

Support from CJ BIO

- Samples & documents: TDS, SDS, COA, specs, certificates (Halal, Kosher, Vegan, plant GMP / FSSC)
- HYBIND regulatory classification & label wording
- Price indication, MOQ, lead time, Incoterms
- Application data, product training & joint customer visits

Next steps

15 Oct 2026
Introduction meeting

By 30 Oct
NDA, documents & samples

Nov 2026
Product training; agree priority account list

Dec 2026
Distribution agreement; first customer presentations

Our commitment: a dedicated team, structured trials and transparent monthly reporting to CJ BIO Vietnam
